GENERAL NOTE

- Modification** The information and components-/system descriptions contained in this Illustrated Parts Catalog (IPC) are correct at the time of publication. BRP-Rotax, however, maintains a policy of continuous improvement of its products without imposing upon itself any obligation to install them on its products previously manufactured. BRP-Rotax reserves the right at any time to discontinue or change specification, designs, features, models or equipment without incurring obligation.
- Note** This Illustrated Parts Catalog (IPC) is not an offer to sell parts, but a catalog illustrating the parts available at ROTAX® authorized distributors. BRP-Rotax reserves the right to deliver the components (crankshaft, crankcase, special tools etc.) only to organizations with respective qualifications, and thus, these special components will not be listed in this IPC.
- Color variations** **Color variations on unpainted castings:**
- On unpainted surfaces (i.e. aluminium cases) minor color variations (i.e. grey tone on aluminum surface) are possible due to the manufacturing process. Such possible color variations do not affect the quality of the product and are no reason for rejection - even a color variation on castings in differing areas is acceptable.
- Revision** This Illustrated Parts Catalog (IPC) will be revised as required.
- NOTE**
- Date of issue is printed on cover and bottom end of page.*

BRP-Rotax
ILLUSTRATED PARTS CATALOG

INTRODUCTION

Explanation As obvious from the cover, this Illustrated Parts Catalog (IPC) covers the current aircraft engines ROTAX® 912 and 914 Series. Certified and non-certified versions are available. Besides the engine-specific parts, the most popular accessories are listed too.

The ROTAX® engine of the type 912 A has been certified in accordance with JAR 22 Appendix H, Amdt. 1 dated 18 May 1981.

The ROTAX® engine of the type 912 F and 912 S has been certified in accordance with FAR Part 33 Amdt. 15.

The ROTAX® engine of the type 914 F has been certified in accordance with FAR Part 33 Amdt. 15 and JAR E Change 9 dated 21 October 1994.

The following ROTAX® engines are non-certified:

ROTAX® 912UL, ROTAX® 912 ULS, ROTAX® 912 ULS FR, ROTAX® 914 UL

**PARTS
ORDER**

At a parts order for a certified engine, state details of application e.g. 912 S certified to EASA CS-E. For these parts an Authorized Release Certificate (FORM ONE TAG, see sample below) will be issued. For parts volume see enclosed packing slip.

Formblatt Nr. 17-046/T—22.11.2017

Figure 1.1: Authorized Release Certificate

NOTE

On all enquiries or spare part orders, always indicate engine serial number, as the manufacturer makes modification to engine for further development.

BRP-Rotax
ILLUSTRATED PARTS CATALOG

Engine serial number When making inquiries or ordering parts, always indicate the engine serial number, as the engine manufacturer might make modifications to the engine in the course of product improvement. The engine serial number is on top of the ignition housing.

Figure 1.2: Engine

REPEATING SYMBOLS

NOTE

Indicates supplementary information which may be needed to fully complete or understand an instruction.

XXX In illustrations this sign indicates the position of the current serial number (e. g. on crankshaft, camshaft, etc.).
In descriptions (in part no. column) this sign indicates, that this part has no part number.

STRUCTURE

Exploded view

Each section starts with an exploded view of the engine components on the left side. The corresponding heading and the listing of the parts is on the right side and the following pages.

The numbering on the exploded view is in the sequence of assembly as good as practicable.

For prevention of errors and to simplify exchange we tried best to list the part number of each component only once. But for better understanding components are frequently depicted without being listed, but referred to a respective section, if considered necessary.

Engine-column

For each engine type the right amount of spare parts per engine is listed in the relevant engine-column.

If the quantity is in brackets, it indicates that the part is not absolutely necessary but optional on the respective engine type.

A small letter added to the number refers to information at the end of the section. No number in the column parts per assembly indicates that this part is not planned for the respective engine.

Abbreviations

Find the following statements in the columns:

N	newly introduced part
AR	as required
